

## Chiropractic Assessment and Treatment Exceptional Funding Request

Before consideration of referral for management in secondary care, please review advice on the Remedy website ([www.remedy.bnssg.icb.nhs.uk/](http://www.remedy.bnssg.icb.nhs.uk/)) or consider use of advice and guidance services where available.

Chiropractic assessment and treatment is not routinely commissioned

BNSSG ICB is responsible for making the best use of the NHS funds allocated to us to meet the health needs of our local population. The demand for services is greater than the resources available and therefore we have to prioritise the use of funds carefully. Our approach is to prioritise commissioning treatments, operations or drugs that are most effective in meeting the health needs of the population. All operations carry significant risks and where symptoms are mild or moderate it is likely that the risks outweigh the benefits. Not all conditions progress and when symptoms can be managed conservatively, that is the safest option.

Chiropractic treatment is considered a complementary therapy and not a conventional medical treatment (NHS Website).

### Chiropractic Treatment– Plain Language Summary

Chiropraxis/Chiropractic treatment is a system of treating bodily disorders by manipulation of the spine and other body parts.

### This policy has been developed with the aid of the following:

1. National Health Service (2019) Health A to Z: Chiropractic [www.nhs.uk/conditions](http://www.nhs.uk/conditions)

### Due regard

In carrying out their functions, the Bristol, North Somerset and South Gloucestershire Clinical Policy Review Group (CPRG) are committed to having due regard to the Public Sector Equality Duty (PSED). This applies to all the activities for which the ICB are responsible, including policy development and review.
