Evaluation Planning Checklist (1 of 2)

Planning Checklist

Planning is a crucial part of the evaluation process. The following checklist (based on the original APCRC checklist) has been designed to help with the process of carefully planning your evaluation, outlining the key steps going forward.

Identify	Questions to ask
Study type	1. Is this a service evaluation or research?
Project Governance	 Who will take responsibility for getting the evaluation off the ground and oversee its delivery? Who will write the evaluation plan, identify the required resources and engage stakeholders? Do you need an advisory or steering group?
Project resources	 4. What resources are available to support this evaluation? What resources do you think you might need / how much might it cost? Who might fund the evaluation? 5. What level or type of evaluation do you need?
Support for the project: All Stakeholders	 9. Who are your key stakeholders? 9. Who needs to be informed? 10. Who do you need to involve in the evaluation planning, delivery and dissemination? 10. Who has skills, experience and expertise to support you with your project? i.e. Patient and public involvement, equalities, communications and engagement, evaluation leads in your own or partner organisations
Support for the project: Service User Involvement	14. How will you involve service users, patients, carers and the public in your evaluation? Consider this in terms of the design, delivery (data collection) and dissemination (communicating your findings).
Context: Evidence Base	19. What is the evidence base for the planned service, service change, pilot?20. How have similar services been evaluated in the past?
Context: Understanding the Service	 Is it clear who the service is for? (population group, needs and characteristics) Is it clear what the desired intermediate and long term outcomes are and how the activities of the service or intervention will lead to these?
Scope of the project	 Have you agreed with your stakeholders the purpose of the evaluation? Are you clear what the evaluation will focus on? Is it clear why you are conducting an evaluation?

Evaluation Planning Checklist (2 of 2)

ms and Objectives of the raluation23. Have you engaged your stakeholders to help you identify your evaluations aims (why you are doin this evaluation) and objectives (what you are trying to achieve)? 24. Are your aims and objectives SMART? 25. What evaluation approach or method are you planning to take? 26. Do you need to commission an external evaluation? 26. What information and data do you already have available to support your evaluation? 27. What additional data collection do you need to undertake to be able to answer the aims and objectives of your evaluation?ata Collection, Analysis ad Reporting26. What data do you need to collect? Will your data collection tools work? Are there any validated tools that can help? Who will collect the data? 27. How will you analyse the data? Who will analyse the data? 28. How and who will write up the findings? 29. Have you identified any training needs to support these activities?mescales,28. What are the timescales for the evaluation and the data collection?	elp you identify your evaluations aims (why you are doin
