

LUNCHTIME SEMINAR

20
February
12:30-13:30

Examining the unintended consequences of using digital health tools in primary care: The DECODE Study

Facilitated by:

Jeremy Horwood and Andrew Turner from NIHR ARC West/University of Bristol

Digital health tools such as online triage, smartphone apps, and patient access to online medical records, are becoming commonplace.

The DECODE study aims to inform implementation of digital health tools in primary care by understanding their unexpected consequences.

Conference room,
South Plaza, Bristol, BS1 3NX
