

# Community Phlebotomy

Primary Care Commissioning Committee  
September 2021

# Update on current position

- Local Enhanced Service offered to BNSSG GPs – excellent uptake
- Communications in place within Trusts and GPs
- Service launch 1/7/21 – funding in place for resource but governance process not embedded within the Trusts, so 3 month period to establish this and launch from 31/10 – GP agreed to this grace period
- Activity in Trusts signals transformation

# Progress

- Clinical leadership in Trusts established
- Red/amber drug monitoring – task and finish group have met and consensus agreed
- SOP revision – task and finish group have met and revisions made
- GP training – held online
- Resources available to Trusts and primary care on one platform

# Next steps

- Community Phlebotomy Operational Group to continue to co-ordinate activity and also to be a forum for discussion of clinical issues
- Align Trust communications and communication to practices
- Monitor data and evaluation of service
- Aim for launch on 31/10/21
