Subject: Patient treatment options for inherited cardiac conditions

I can confirm that the ICB does hold some of the information requested; please see responses below:

QUESTION	RESPONSE
As a patient with an inherited cardiac condition (hypertrophic cardiomyopathy) I would like to establish what centres within the ICS would I be under the care of? I.e., what hospitals have a dedicated inherited cardiac conditions team.?	University Hospitals Bristol and Weston (UHBW) and North Bristol Trust (NBT) are listed as the local referral options.
If they do not have a dedicated team or would not treat the condition where would patients be referred to?	Further information can be found on the webpage below: https://remedy.bnssg.icb.nhs.uk/adults/cardiology/inherited-cardiac-conditions/
Specifically, would a local hospital manage drug treatment up until the stage of surgery (septal ablation or surgical myectomy)?	For more information, please contact UHBW and NBT directly: UHBW: FreedomOfInfo@uhbw.nhs.uk
If surgery is not offered where would the patient be referred to?	NBT: foi@nbt.nhs.uk

The information provided in this response is accurate as of 28th June 2023 and has been approved for release by Jon Lund, Deputy Chief Finance Officer for NHS Bristol, North Somerset and South Gloucestershire ICB.
