Subject: Bleed kits for Bristol and Somerset

*I can confirm that the ICB **does not hold the information requested**; please see responses below:*

QUESTION	RESPONSE
This is an area fraught with issues and as the local and national ambulance services currently have no ability to activate these kits, and that there is no agreed standard for these, may I ask a couple of questions?	The ICB does not hold this information. We advise you to redirect your request to NHS England and Avon and Somerset Police. england.foi@nhs.net https://www.avonandsomerset.police.uk/about/freedom-of-information/freedom-of-information-foi-request/
1. What was your clinical rationale for endorsing these kits?	
2. Have you reviewed the kits contents and considered their use by the untrained public?	
3. Do you have appropriate PTSD and clinical backup for the rescuers/members of the public?	

4. Has you or NHS Standards agreed to allow the use of the NHS logo on a commercial cabinet?	
5. What clinical training is being offered to the public in areas of these kits?	
6. Have you the agreement of the ambulance services to install?	
7. Who is paying for this?	
8. Does the supplier have a clinical background?	

The information provided in this response is accurate as of 21 September 2023 and has been approved for release by Rosi Shepherd, Chief Nursing Officer for NHS Bristol, North Somerset and South Gloucestershire ICB.
